

GREEN BLOCKS BLUE SOUND

NEIGHBORS INSTALLING GREEN INFRASTRUCTURE AND
MOVING TOWARDS THE PATH OF SUSTAINABILITY

ONE BLOCK AT A TIME

SUSTAINABLE
SEATTLE 

Managing Stormwater at Home

Green infrastructure is a hot topic in Seattle – your neighbor may have even installed a rain barrel or rain garden on their property. But why is it important? And is it a good fit for your property?

On October 11, Sustainable Seattle will be having an information session in your neighborhood to talk about stormwater management and our green infrastructure program, Green Blocks Blue Sound! You will also learn about the city's incentive program, RainWise, which provides rebates for green infrastructure installed on private property in certain neighborhoods. So join us to learn, connect with neighbors, and build Green Blocks! Contact Hannah at hannahk@sustainableseattle.org for more information.

When: October 11, 6:30pm to 8pm

Where: Wedgwood Elementary School Library, 2720 NE 85th St

Cost: Free, with Snacks provided!
