Common Themes

-Channelization improvements were requested along segments of NE 65th Street, NE 75th Street, 25th Avenue NE, 35th Avenue NE and Banner Way NE and at several signalized intersections

-Speeding is a problem along the NE 75th Street corridor and along segments of nearby arterial streets

-The eight schools in the area increase pedestrian, bicycle, and vehicle volumes twice a day. Speeding on non-arterial streets during drop-off/pick-up hours is a problem near schools. Many students walk and bike to school and student safety is a priority for residents. New construction at Thornton Creek Elementary will likely change traffic patterns.

-There is a strong desire to improve pedestrian and bicycle safety throughout the area. Suggestions included adding more and improving existing marked crosswalks, constructing sidewalks, adding bicycle facilities to NE 65th Street and NE 75th Street, and improving signal performance for pedestrians and cyclists.

-Improve access to parks throughout the area and reduce speeds on adjacent streets

-Improve existing traffic signals to reduce turning movement conflicts with pedestrians and bicyclists and improve traffic flow

-Encroachments in the right-of-way limit pedestrian mobility and reduce visibility for all

-Congestion is an issue along several corridors during peak hours. This often leads to cut through traffic on non-arterial streets.

-Existing parking restrictions should be reviewed and existing parking laws should be more strictly enforced. New parking restrictions are needed in a couple of locations.

-Increased enforcement efforts are needed area-wide to address speeding, distraction driving, impaired driving, and pedestrian and bicycle safety issues

## Spot Safety Issues and/or Suggestions

NOTE: See 'Common Themes' inset above for area-wide safety issues and suggestions

Pedestrian-Bicycle Issues: Includes new and enhanced crossing requests, requests for new pedestrian and bicycle facilities, and encroachment/visibility concerns

Vehicular Traffic: Includes new signal and signal modification requests, channelization issues, cut through traffic, encroachments/visibility concerns, and turning movement conflicts

Multiple Issues: Locations where a number of issues affect traffic safety for all modes

# NE 75th Street Road Safety Corridor Project
